

RELIABLE MOLDED PULP VOID FORM™

PART 2 – PRODUCTS

2.01 VOID FORM MATERIALS AND ACCESSORIES

- A. VOID FORM SYSTEM: Use molded pulp void forms to properly create support for the placement of structural concrete over expansive soils as manufactured by RELIABLE MOLDED PULP VOID™ (Reliable Void Form), 13801 Avenue K, Austin, TX contact Cheryl Andrews 361-549-0186.

PART 3 – EXECUTION

3.01 FORMWORK

- A. PLACEMENT OF VOID FORM: Store void forms and accessories in accordance with manufacturer's recommendations. Place void forms over properly prepared surface as directed by architect or design engineer. Install void forms and accessories in accordance with manufacturer's recommendations. Place a layer of protective cover board over the void form no less than 1/8" thick (or board approved by manufacturer) to facilitate working load and concrete placement. Cover with specified vapor barrier.
